## BerryAlloc Parquet, a natural choice.

Each plank of parquet is unique. When you invite it into your home, you bring a piece of the natural world inside. And you benefit from the best it has to offer : simple, clean lines, the basis for refined decorative styles and comfortable atmosphere.

BerryAlloc offers you a great deal more than a wide selection of parquet floors to meet your needs. BerryAlloc also offers you a floor that is strong and long-lived - the certainty of a durable and beautiful parquet.

You may enjoy this wonderful experience courtesy of our expertise in two main areas of excellence : a careful selection of species and rigorous care at every level of the transformation process. Our products are manufactured with the greatest possible respect for the environment. All these factors are vital in ensuring the quality of your floor.

BerryAlloc is a master of sublime interior design. BerryAlloc has just the right flooring for all domestic and public spaces, from your bedroom to an airport lounge.

In addition to natural wood parquet, BerryAlloc also offers a complete range of laminates and vinyl floors, and a wide choice of wall coverings. Our product range is sure to include the decor of your dreams, perfect down to the smallest detail. For a life of pure bliss.

The BerryAlloc group enjoys an international reputation for quality, innovation and reliability, in both its products and its services.

See the full BerryAlloc range at [www.berryalloc.com](http://www.berryalloc.com).

WHEREVER. FOREVER.

## Parquet made at the edge of Europe's finest oak forest.

Exceptional oak trees grow in a special world, rich in history and tradition, the preserve of deer and birds of prey, and the source of our parquet flooring : in the heart of the beautiful Tronçais forest, famous for its ancient oaks.

Its timber is appreciated for its unusually fine-textured and unblemished quality. It is used to make casks and barrels for the finest cognacs and the greatest Bordeaux wines, and is much sought after by wine producers from Italy, Spain, Australia and even the United States.

So considering all this, how can we do anything other than ensure you receive the very finest parquet? Our success is based on generations of forest and timber knowledge, combined with the very latest manufacturing techniques.

# Respectfull

## Because our forests deserve it.

A BerryAlloc parquet is much more than the answer to your longing for exclusive surroundings, evoking the natural world. It is also a responsible choice. It comes from a company that loves its product, and cares for the environment as well as for your lifestyle.

### Sustainable forestry

The wood selected both in France and abroad comes from controlled sources managed in accordance with the criteria of the forestry stewardship certification, requiring strictly-controlled traceability and monitoring at every step of the manufacturing and sales processes (PEFC<sup>1</sup> and FSC<sup>2</sup> certification well-known for sustainable forestry management).

1. PEFC : Promoting sustainable forestry management ([www.pefc.org](http://www.pefc.org)). BerryAlloc has been PEFC certified since 2007 for its HDF boards, as well as for oak, beech, maple, walnut and sapele, which represent over 90% of our production.
2. FSC : Responsible Forest Management © Forest Stewardship Council A.C.

*Watch as your floor ages beautifully, developing a patina  
of memories, only improving over time*

# A natural material with added excellence.

## A sustainable quality of life

- **No volatile solvents** in the varnishes and glues used.
- Reduced dust emissions.
- Formaldehyde emissions are kept down to **almost naturally-occurring levels**.
- Class A+\* label<sup>1</sup> relating to VOC emissions, thus helping to **protect indoor air quality**.
- Parquet is laid on top of a base of HDF (High Density Fiberboard), an E1 certified natural product.

Our emission results are **well below regulated levels** (at naturally occurring levels for wood)

Live your parquet. Respect its origins. All in perfect serenity.

## A question of origin : 100% Made in France

Our parquets are certified "Parquets de France", a label guaranteeing you the choice of a quality product made with **French know-how**, a true added value. Invest in a long-term choice, guaranteed by the radical choice of raw materials and manufacturing in line with very demanding criteria.

## Forests, playing their part in the battle against global warming

Wood is a "carbon sink". Your choice of a BerryAlloc parquet is making an active contribution to **reducing the greenhouse effect**. As it grows, every tree captures much of its CO<sub>2</sub> from the air we breathe, binding it in the form of carbon. Furthermore, parquet is 100% renewable.

## Preserving natural resources

Our commitment to the environment has its effects in our Manufacturing process :

- The cardboard box used for packaging is made of **95% recycled fibres**.
- Our water consumption was reduced by more than 85% over 5 years (saving the volume of 4 Olympic swimming pools every year).
- Saw dust from production is **reused as boiler fuel** in the plant's heating system, and to generate hot water.
- We participate in the French program for **recycling packaging materials**.

\* Class A+ : Health classification labels for construction products

## Why BerryAlloc parquet?

Go with quality right from the start, and for a lifetime.

### A range of exclusive and attractive parquets

The BerryAlloc parquet collection offers you a choice of :

- many **species of wood**, each with its own particular character,
- a wide **range of sizes** : from narrow 1-strips to extra-wide planks, and 3 strips,
- a **very tough high-tech varnish**, easy to maintain, or a **natural, deep-oiled** traditional finish,
- a **range of colours and finishes** that suits current styles (brushed, tinted, limed,...).

Explore our extensive collection of parquets and create the ambiance that best suits you. Whatever you choose, BerryAlloc parquets will give your interior its very own unique, natural character.

New!

### Soft Touch Varnish :

an exceptionally silky surface feel

You love the feeling of softness, and you need to feel the incomparable texture of wood beneath your feet, without giving up the solid quality of a varnished parquet floor? Explore the latest generation of our Ultimtec® Soft Touch varnish, which in addition to its **exceptional strength** offers you **the pleasant, authentic soft feel** of oiled parquet.

### So much simpler to install

BerryAlloc introduces Best Loc® X-Treme, an easier, quicker and longer-lasting installation method. No tools or glue needed; simply click the boards together. Your parquet is easy and quick to install, no matter what length or floor area is to be covered. We offer a lifetime guarantee, because the quality and toughness of this revolutionary system are clear.

## A tough surface

BerryAlloc's high-tech wear- and scratch-resistant varnish is the result of molecular nano-technology, offering the undisputed top-performing product on the market : Ultimtec®. The wood receives six coats of varnish, making it ultra-tough, beautiful to look at and easy to maintain, and protecting its colour over time. For life.

## An excellent product

Because wood continues to live even after it has been cut, the question is sometimes asked : how will the floor act once it is installed?

No need to worry, though : the structure of BerryAlloc parquet is designed to stand the test of time. The central HDF core (High Density Fiberboard) was a technically inspired choice. It offers :

- an **extremely stable floor**,
- greater **impact resistance**,
- more **efficient** floor heating,
- **perfect joints** thanks to more accurate machining.

## Warranty

Our parquets have up to 50 year warranty guarantee in normal, domestic use\*. In addition, this warranty is reinforced by a lifetime warranty of the Best Loc®/Best Loc® X-Treme interlock system.

\*Please check our warranty conditions.

The colours of  
BerryAlloc parquets.

## Gold Impressions

Blond color tones of honey, wheat, and sunshine. Soft and golden shades to choose from, for floors conjuring up images of ancient castles, and of old stately homes, still very much alive and regaling us with tales of yesteryear. But these parquets in GOLD color tones can also infuse your living spaces with a modern touch, illuminating your life with natural shades. Whatever your style, rustic or contemporary, a fine BerryAlloc parquet in oak, beech or maple will ensure your living space is invested with the harmony you are seeking.

1. Oak Light White - 2. Canadian Maple - 3. Oak Natural - 4. Beech - 5. Oak Limed - 6. Oak Cream - 7. Oak Smoked

Wherever. Forever.

Wherever. Forever.

Noble - Oak Natural White

# Pure Impressions

You dream of white, to fulfil your longing for purity and austerity in your flooring. But unlike those who do not think of white as a colour, you take a completely different view. And you know that white offers an infinite range of nuances, from polar white to white sand. You are correct. The proof? Take a look at BerryAlloc's PURE tones : a range of parquets in white oak, single plank or 3-strips, which will give your living spaces the ethereal elegance and brightness you seek, enhanced by the warm and living nuances you have been dreaming of.

1. Oak White - 2. Oak Natural White - 3. Oak Polar White - 4. Maple White - 5. Oak imperial white - 6. Oak Pure - 7. Oak White Sand

# Trendy Impressions

Do you have a "city" state of mind? Are you "streetwise"? Do your living spaces reflect the thousand and one facets of a life in constant flux? Or do you simply love grey shades for their contemporary refinement, their multiple possible variations? No matter how specific your tastes, BerryAlloc offers you a range of TRENDY oak parquet. From pure grey over misty grey to moonstone grey, pearl grey and mineral grey, you make your own choice.

1. Oak Pearl Grey - 2. Oak Antique Grey - 3. Oak Mineral Grey - 4. Oak Exclusive Grey - 5. Oak Vintage Grey - 6. Oak Light White - 7. Oak Moonstone Grey

A woman with long brown hair, wearing a straw hat, a black and white striped shirt, and white pants, is riding a light-colored bicycle with dark red tires. She is smiling and laughing. The background features a large, light-colored stone building with a dark wooden double door and several windows with dark frames and shutters.

Wherever. Forever.

Wherever. Forever.

# Impressions Lounge

A wood fire, a dimmed light, a leather club chair, just as snug as a bug in a rug - who does not dream of such warm, comforting surroundings? BerryAlloc's cosy LOUNGE range, offers you the natural beauty of dark oak and walnut, turning your home into one of the most welcoming and comfortable of places in the world.

1. Nut Brown - 2 & 3. American Walnut - 4. Oak Havana - 5. Oak Savane - 6. Oak Wild Antelope

# Impressions Black

The red dust of an exotic hillside, the orange tones of an Amazonian sunset, the savannah grasses beneath a baking sun, the dark tones of the wild jungle, the pink-brown softness of a tree rooted in a tropical river, BerryAlloc introduces its BLACK range. Merbau, jatoba, iroko, doussie, wenge, sapele : so many species, giving dramatic, naturally beautiful contrasts to your long-lived, durable floors, transporting you to exotic locations.

1. Wenge - 2. Doussie - 3. Wenge Ethnic - 4. Sapelli - 5. Iroko - 6. Merbau - 7. Jatoba

Wherever. Forever.

# The BerryAlloc Parquet Collection.

Wide-open vistas, to suit the pace of your life.

## Just as you want it

Choosing a parquet is not just a matter of preferring one type of wood over another. You are also seeking to enhance your living space, in accordance with its dimensions and outlook. A small room? A large hallway? This is where the width and length of the boards you choose will really come into play. This is why BerryAlloc's 8 ranges of parquet come in a variety of colours and finishes, as well as different widths.

We specialise in oak, single-plank parquets, with 7 arrangements of planks in a number of widths and lengths, suitable for a variety of uses, and we also offer 2 ranges of our timeless 3-strips.

Wherever. Forever.

Millennium - Oak Residence Havana

### Single plank

We offer refined luxury, in our huge selection of single plank parquet flooring, with pure, uncluttered lines. Available in several widths, from 110 to 187 mm, and various structures. For a more austere, linear and unified appearance, making your room appear larger.

### 3-strip

Simple decorative effects with our timeless 3-strip parquets. The design comes as a single plank consisting of several shorter and narrower (70 mm) pieces, arranged in a 3-row, staggered pattern.

# Millennium

BOARD (mm) : 1180 L x 130 W x 16,5 TH

FACING THICKNESS (mm) : 6

PACKAGING : BOX : 7 boards - 1,07 m<sup>2</sup>

PALLET : 88 boxes - 94,49 m<sup>2</sup>

New!

**Gives you the authenticity of a solid wood floor!**

With a 6 mm thick top layer, Millennium is the most robust of our parquet collection.

- Suitable for **high-traffic locations** such as shops, hotels, museums, etc.
- **Very stable** with its carefully-designed structure, and birchwood ply core
- A very **tough and natural surface**, of exceptional softness, with Ultimtec® Soft Touch varnish
- Significant reduction in the use of natural resources, for the same look and usage
- Available in oiled or varnished finish, or unfinished

# BerryAlloc Parquet: The language of wood

## A clearly-defined selection

Natural shades, plank after plank

Each plank shows a natural variation in the shade of colour of the wood. Wood is a natural resource which makes each plank unique. For example : while an oak plank may show variations from light blond to warm brown, an exotic wood such as jatoba has more marked contrasts, from deep pink to an orangey-red.

Oak

Iroko

Beech

Doussie

Canadian Maple

Jatoba

American Walnut

Merbau

Sapele

Wenge

## The strength of each species

A parquet's wear resistance derives from the type of wood used, and the thickness of the top layer. So the harder the wood, the higher the wear resistance.

In order to provide excellent, long-term wear-resistance, our collection does not include species that are low on the hardness scale (e.g. cherry, birch).

Wood exposed to sunlight is subject to varying alterations in its colour. We recommend using wood that is more sensitive to sunlight in less brightly-lit living areas.

### Less sensitive to light

Beech, Oak, Canadian Maple,  
European Maple, American Walnut

### Sensitive to light

Doussie, Iroko, Jatoba, Merbau  
Cherry, Wenge

Warning : BerryAlloc parquet may not be used for decks or patios.

# BerryAlloc the essential choice

3-strip oak

## Elegance

- Bright, evenly-coloured wood
- Straight grain and silver grain
- No sapwood at all

## Natural

- Slight contrasts in the wood
- Straight-grain, slab, silver grain and some small knots, less than 5 mm in size
- No sapwood at all

## Authentic

- Contrasted-coloured wood
- Presence of knots or groups of knots (15 mm max), marked slab
- No sapwood at all

## Country

- Highly-contrasting coloured wood
- Presence of sapwood, few knots

## Single plank oak

### Château

- Light, uniform colour woods
- A few small knots less than 10 mm across
- No sapwood
- Straight grain, slab and silver grain

### Manoir

- Wood of various colours
- Knots up to 25 mm across
- No sapwood
- Straight grain, slab and silver grain

### Résidence

- Highly-contrasting coloured woods
- Knots up to 40 mm across and black knots accepted
- Sapwood present
- Straight grain, slab and silver grain

From the wood fibre to the knots, the language of wood

Each plank has its own features, and its appearance speaks with a very particular vocabulary.

Straight grain

Small knots

Silver grain

Filled knots

Slab

Sapwood

# Surface treatment

In order to preserve the natural beauty of our parquets and to improve their strength, we apply various protective finishes at the end of the manufacturing process, making your parquet ready for immediate installation without further treatment.

## High-tech surface varnishes

Our surface varnishes, which are very rich in aluminium oxide, make our parquet floors highly tolerant to wear, easy to maintain and preserve their natural appearance for years.

### Masterresist®

Applied in 6 coats, the protective varnish is thick enough to protect your floor and make it easy to maintain. It has a beautiful satin, patinated or matt finish (oiled appearance).

### Ultimtec® : Without doubt, the best varnish on the market\*

Ultimtec® varnish sets new standards for durability and strength. Its nano-technology formula provides extremely high resistance to scratches and wear (over 10,000 Taber cycles). There are 3 finishes : satin, patinated or matt (oiled appearance).

### Ultimtec® Soft Touch: an exceptional sensation.

New generation varnish from our R&D department : As well as the unparalleled performance of the Ultimtec® varnish, it is very silky to the touch, with an exceptional surface quality. There are 3 finishes : satin, patinated or matt (oiled appearance).

## Oiled finish: centuries-old wood treatment

The parquet is deeply impregnated with a high-quality oil, to nourish and protect the wood. Oiled parquet requires regular maintenance, depending on the usage, in order to preserve its original appearance and the true nature of the materials long term (cf our maintenance products).

## Unfinished

Our bare oak parquet flooring can be given a tailor-made finish after laying. For example, you can apply our tinted BerryAlloc Solid'Oil products, for finishing after laying.

## Brushed finishes

The wood is brushed mechanically to highlight its grain structure and to visually reinforce its robustness. Five individually adjustable mechanical brushes are used to impart the desired brushing to the wood.

\* We compared Ultimtec® with 11 products selected from its competitors, represented in the European market. Result : Ultimtec® showed its superiority in both resistance to wear and the scratch resistance test.

## Installation methods

Our R&D laboratories are constantly seeking new methods for manufacturing simple parquet flooring, that is very strong and easy to install. We can now supply very effective systems, with lifetime guarantees, which help in installing and uninstalling the flooring.

### Best Loc®: Angle-angle installation method

The quality of its profile and the angular locking (length/width) makes it easy to lay without tools, glue or mallet. Experience shows this is certainly one of the best locking systems in the world.

### Best Loc® X-Treme: Flat installation

Installation is even easier, simpler and faster (up to 30% faster compared to Best Loc®). The planks are laid one after another, by simply folding them into place. No tools or glue needed.

### Life time warranty:

Our installation systems are remarkably strong, and so durable that Best Loc® and Best Loc® X-Treme come with a lifetime guarantee.

# Accessories & finishes

Wherever, forever, perfect down to the smallest details.

Accessories form the final touch to ensure your floor is a complete success. BerryAlloc has a very wide range of accessories, to suit your floor or your wall.

For perfect laying

## **The BerryAlloc underlay, the vital accessory for your comfort**

Underlay forms an essential element in the laying of your floor to correct irregularities, provide the optimum sound-proofing for the room itself and the rooms below.

### **Excellence+ underlay, extra heavy for extra sound insulation**

- corrects irregularities in the floor
- includes an adhesive strip
- protection against the build up of humidity and damp
- great noise insulation (-21 dB), both in the room and in rooms below
- available in 10 m<sup>2</sup> rolls

### **Excellence Endurance Underlay**

- permanent extra high load-bearing resistance to heavy weights (as per the French DTU51.11 standard)
- integrated adhesive strip
- corrects irregularities in the floor
- protection against the build-up of humidity and vapor
- sound insulation (-19dB)
- available in 20 m<sup>2</sup> rolls

## Skirting

The ideal solution for an exclusive wall finish, matching the colour of your parquet.

### Modern skirtings

A simple, austere design, for a contemporary decorative touch.

2400 mm x 14 mm x 80 mm (L x W x H)

### Quarterrounds

The essential fitting to link an existing skirting to a new floor, and also to hide the expansion joint.

2400 mm x 14 mm x 14 mm (L x W x H)

### White skirting 100 mm

2400 mm x 14 mm x 14 mm (L x W x H)

Three-in-one adjustment  
and connection profile : Profile 1

BerryAlloc offers a 3-in-1 profile, as tough and durable as our parquets, for transition between two types of floor covering, to hide a difference in height or an expansion joint.

Supplied with a cutting tool and fixing bar.

930 mm long x 45 mm (min.) or 62.8 mm (max.) wide

2150 mm long x 45 mm (min.) or 62.8 mm (max.) wide

## Threshold

For a perfect finish around the edge of your floor, or to ensure the transition with a sliding frame, a door threshold, etc.

## Reducer

A reducer provides a perfect link between your new parquet and a lower floor (tiling, carpet, etc.).

## T-profile

Provide a perfect transition between two planks, and hide the expansion joint.

# Recommended methods of laying for complete satisfaction

Follow the instructions in our manual  
when laying the flooring

## Some basic rules

- Before laying, let the parquet lie flat in the room for 24 to 48 hours.
- Make sure the supporting surface is clean, even, firm and dry.
- It is essential to leave a gap of 8-10 mm around the edge of the room, so that the parquet can move freely.
- Mix the planks from several packs in one production batch, so that the overall appearance of the floor is balanced.
- Our parquets may be laid on a floating or glued-down base.
- Our parquet is suitable for laying over a low-temperature, heated floor (max 28 °C except for beech, maple and jatoba). “Glued-down” laying ensures that the under-floor heating is efficient.
- Laying over a cooled floor is not recommended, and is not covered by our warranty.
- Do not lay BerryAlloc parquet in damp rooms! water is the N°1 enemy of parquet.

Noble - Oak Manoir Savanna

## Stairnose

You can give your staircase an ultra-tough finishing touch with the BerryAlloc covering profile. This stairnose is made of aluminium covered with an oak laminate. It is also very practical if the stair is finished in a different material than the landing (carpet, vinyl, tile, etc.). BerryAlloc also offers the Perfect Fit profile. It locks onto the parquet, and results in a perfect, smooth transition. A staircase as good as new!

Stairnose with  
Perfect Fit profile

Stairnose without  
Perfect Fit profile

Perfect Fit profile  
Stair nose profile

Available in aluminium covered with oak decor.

Stair nose profile : 1000 mm or 2400 mm

Perfect Fit profile : 1000 mm or 2400 mm

## Long and beautiful life

The durability of your investment is optimized by taking the necessary minimum care and attention. Let us give you some advice for keeping your parquet beautiful.

### Always a clean floor

Dust, fluff, stains and everyday dirt... You just need to sweep or vacuum, dust or wipe with a cloth. But, be careful! If you are using a floor cloth, make sure it's not too wet : water and wood do not get along...

## A scratch? The solution!

We come and go, live our lives in our house, apartment, workshop or office. Don't worry. Little scratches can be easily hidden by applying a felt marker matched to the colour of your wood. BerryAlloc provides 12 different shades for you to repair your floor, no matter what species of wood it is.

## Gleaming, year in, year out.

If your BerryAlloc parquet should start to show signs of fatigue and lose its vividness, simply rejuvenate it! Clean it very carefully, then apply a grease-remover. Finally, apply a renovating coat. This will restore its splendour, enhanced by the patina of the years.

### Recommended products for lacquered floors :

#### **Grease-removers**

- BLANCHON super-active cleaner
- Remover BONA
- Parquet Cleaner OVERMAT

#### **Renovating polish**

- BLANCHON renovator
- Méta Mat BLANCHON
- Vitrilor SYNTILOR
- D 509 BONA
- Polish Remover OVERMAT

### Recommended BerryAlloc products for oiled floors :

Oiled parquet flooring requires regular maintenance, depending on the usage of the room, in order to preserve its original appearance and the true nature of the materials long term.

#### **Natural soap**

BerryAlloc 100% vegetable natural soap is used for regular deep cleaning of oiled parquet. Powerful, it preserves the natural appearance and beauty of the parquet and is improving its protection. Supplied in 1 L bottles.

#### **Maintenance oil**

Oil and wax-based BerryAlloc maintenance oil protects the parquet and preserves the natural, warm appearance of the oak. Gives protection and patina to the parquet. Oil ready for use. Supplied in 1 L bottles.

#### **Coloured oils**

BerryAlloc Solid'Oil coloured oils are used to repair oiled parquets easily and effectively. There are a number of shades to match the colours of our collection of oiled parquets. They may be mixed with our hardener for faster drying. They may also be used for full renovation, or may be applied to bare parquet boards. (see instructions for use). Supplied as : 250 ml (+ option hardener 50 ml).
